Investor & partner briefing — thinking-process evaluation for technical hiring

v1.1 · August 2026 · hello@chaminext.com · chaminext.com

1. Thinking process (the signal)

We grade thinking process — not just final answers.

Their prompts give away their thinking process: constraints first, edge cases, verification vs blind paste, iteration discipline.

- Live reasoning transcript + adversarial follow-up
- Mandatory walkthrough / defense
- AI-assisted work with disclosure — scored on how they wielded the tool

2. Moat

Graded thinking-process trail on both sides — practice and Interview Studio on the same rubric.

Flywheel: prompt trace !' defense !' ship artifact !' profile !' employer rank !' hire o

Prep tools never see hire outcomes. Screening tools never see daily practice at scale. Owning both on one eval stack is the moat.

3. Hiring loop — candidates

- **CV pre-screen !' /journey, /coach, talent profile**
- **Recruiter screen !' /loop, recruiter-domain mocks**
- **Technical screen !' /practice, /drill, /skills**
- **Ship test / Work Ticket !' PR submit, AI disclosure**
- **Soft skills (5 phases) !' behavioral rubrics + coaching**
- **Pairing / final !' project walkthrough, full-loop simula**

Tracks: Software · AI Engineer · Quant · Cybersecurity · Market Eng · AI for Science

4. Hiring loop — employers (Interview Studio)

- **Configure roles: Ship Test + soft-skills pack per opening**
- **Rank on thinking, shipping, communication — same dimensions candidates practice**
- **Small €250/mo · Growth €900/mo · Enterprise custom · 60-day pilot**

5. Pricing (founding 40% off — FOUNDING40, first 30 payers)

Daily €0 · Sprint €89.40 (list €149) one-time / 90 days · Season €29.40/mo (list €49/mo)

Small Business €150/mo · Growth €540/mo · Enterprise custom

30-day Builder trial · B2B annual = 2 months free · mission pricing for nonprofits
