

ChamiNexT

Thinking-process evaluation for technical hiring in the AI era

v1.1 · August 2026

Investor & partner briefing

In the AI era, output is cheap. How someone decomposes, prompts, iterates, and defends under pushback is the signal.

- Thinking process graded — not just final answers
- Two-sided eval: practice builds the trail · Interview Studio ranks on it
- Configurable hiring loops for candidates and employers

CONFIDENTIAL — FOR INVESTORS & DESIGN PARTNERS

1. Thinking process (the signal)

We grade thinking process — not just final answers.

In the AI era, output is cheap. How someone decomposes, prompts, iterates, and defends under pushback is the signal.

Their prompts give away their thinking process. Did they clarify constraints first? Ask for edge cases? Verify or paste blindly? Iterate when something failed? A prompt log is a decomposition trace — harder to fake than a green checkmark.

Every session combines

- Reasoning transcript from live AI mocks (think-aloud, adversarial follow-up)
- Mandatory walkthrough / defense — claims must survive challenge
- AI-assisted work with disclosure — scored on how they wielded the tool, not whether they used it

Scored dimensions

- Prompt trail — what they asked AI, in what order, with what constraints
- Live reasoning — trade-offs before coding, recovery from pushback
- Research hygiene — look-ahead, leakage, overfitting (quant / AI-for-science)
- Adversarial defense — methodology that survives challenge
- Ship proof — deployed URL or PR with disclosed AI use

2. Moat — what is hard to replicate

A graded thinking-process trail on both sides of hiring — practice and Interview Studio on the same rubric.

Flywheel

```
P r o m p t / r e a s o n i n g   t r a c e ! '   l i v e   d e f e n s e ! '   s h i p   a r t i
r a n k ! '   h i r e   o u t c o m e ! '   r u b r i c   r e c a l i b r a t i o n
```

Today

- Transcript + prompt-trail scoring on live mocks
- Mandatory walkthrough rubrics wired into the interview agent
- Field reports from real interviews linked to one-click practice
- Two-sided architecture: candidates build the trail; employers rank on the same dimensions

Tomorrow

- Which process signals (prompt quality, pushback recovery, iteration discipline) predict onsite pass and good hire
- Rubric recalibration calibrated per employer and role

Prep tools (LeetCode, getcracked) never see hire outcomes. Screening tools (HackerRank) never see daily practice or prompt trails at scale. Owning both on one eval stack is the moat.

3. Hiring loop — candidates

Candidates rehearse the full funnel before the real loop — not isolated puzzles. Stages, tracks, and coaching paths are configurable to match target companies.

Stages !' practice surfaces

CV & pre-screen	Talent profile, Coach onboarding, mission-fit narrative · /journal
Recruiter / HR screen	Recruiter-domain mocks, motivation and fit probing · /loop · /practice (recruiter domain)
Technical screen	AI mocks with adversarial follow-ups; skill-tree fundamentals; 5-min drill · /practice · /drill · /skills
Ship test / Work Ticket	24h / 72h / 7d builds; 4h Work Ticket with PR submit; AI allowed + disclosure · /practice !' Ship Tests · /journey !' ship-test
Soft skills & team fit	Five-phase behavioral pipeline; ethics probes; STAR coaching playlists · /coaching/ethics-soft-skills · /journey !' soft-skills
Pairing & final loop	Project walkthrough coaching; system design; full-loop simulation · /coaching/project-walkthrough · /loop

Tracks

Software · AI Engineer · Quant · Cybersecurity · Market Engineering · AI for Science

Customization

- Choose track + target companies in Coach onboarding
- Interview intel (/intel) — practice exact questions from real processes
- Full-loop simulation (/loop) — recruiter !' technical !' behavioral with debrief
- Field reports — log what you were actually asked; platform generates practice problems

4. Hiring loop — employers

Interview Studio mirrors how growth-stage teams actually hire — configurable stages, rubrics, and assessments per role. Same eval dimensions candidates practice on.

CV / profile pre-screen (Planned)	Talent profile with thinking + ship scores (roadmap: mission rubric)
Recruiter screen (Live)	Recruiter-fit rubric; ranked shortlist export
Work Ticket / Ship Test (Live)	Assign custom or template tickets per role; PR + deploy scoring; AI disclosure required
Soft skills (5 phases) (Live)	Configurable soft-skills pack per role — ownership, conflict, pragmatism, mentorship, ethics

Pairing / repo review (Planned)	Custom starter repos per stack; devcontainer branches (roadmap)
------------------------------------	---

Interview Studio

- Create roles with Ship Test + soft-skills pack toggles
- Rank candidates on thinking, shipping, and communication
- CSV export for ATS handoff; Growth tier adds volume + custom Work Tickets
- 60-day free pilot on all paid tiers
- Enterprise: custom rubrics calibrated to your bar, SSO, API

Configure your actual funnel in Interview Studio — we calibrate rubrics from your "great hire" stories.

5. Competitive landscape

LeetCode	Grades final answer only — no thinking-process trail; signal dead under AI
HackerRank	Async pass/fail on output — no prompt trail or mandatory walkthrough
getcracked	Strong quant prep intel — no live process grading or employer-side eval
Alcrowd	ML competitions — not stage-aware hiring simulation
ChamiNext	Thinking process graded on both sides — practice builds the trail; Interview Studio ranks on it

6. Pricing

Founding 40% off — first 30 payers — code FOUNDING40 (40% off, first 30 payers).

30-day Builder trial (one per device until server-backed accounts)

Individuals (job seekers)

Daily

€0 forever — Duolingo-style daily loop — free front door

- Daily loop + streak tracking
- 2 AI interviews / day
- 1 Ship Test / month
- Basic talent profile

Sprint

€89.40 founding (list €149) — One payment · 90-day access · active job hunt

- Unlimited AI interviews + all Ship Tests
- Work Ticket practice (PR submit)
- Portfolio export · talent profile visible to employers

Season

€29.40/mo founding (list €49/mo) — Cancel anytime · 3–4 month typical runway

- Unlimited AI interviews
- All Ship Test + Work Ticket formats
- Skill tree tracks + drill paths
- Portfolio export + coaching notes

Companies (Interview Studio)**Small Business (Up to 50 employees)**

€150/mo founding / €250/mo list — Annual = 2 months free · 60-day free pilot

- 2 open roles · 25 assessments / month
- AI interviews + one custom Ship Test
- Soft-skills rubric pack · ranked shortlists · CSV export

Growth (50–500 employees)

€540/mo founding / €900/mo list — Annual = 2 months free · 60-day free pilot

- 10 open roles · 150 assessments / month
- Custom Ship Tests + Work Tickets per role
- Soft-skills rubric packs · priority support

Enterprise (500+ employees)

Custom annual contract — Mission pricing available for nonprofits / research labs

- Unlimited roles · SSO / SAML · API + ATS integrations
- Custom rubrics calibrated to your bar
- Dedicated support + security review
